Sutcliffe Play

 **MADE IN
BRITAIN**

Step into a **NEW** world
with our toddler *fantasy* range...

As if by magic, an amazing new chapter in play begins...our latest spellbinding creation, Fantasy, is here!

This epic range for toddlers aged from 3 to 8 years, introduces a massive 14 standard units and another 6 themed, some of which are in this brochure. We have also added a trio of complementing inclusive springies – all with a fairytale/fantasy theme.

Bringing pixies, elves, wizards, trolls, unicorns and more to the playground,

toddlers will enjoy a truly magical time discovering all of Fantasy's secrets and surprises.

Each standard and themed unit in the range is packed with play value and colourful creativity from top to toe, and conjures up a wondrous selection of play activities from ground level to 1.2m high.

The springies, meanwhile, provide the perfect accompaniment to all of the new units, and bring plenty of robust rocking fun to any sized space!

Pentagon

Built to last

Fun for all

This toddler range includes a huge variety of configurations, beginning with the smallest cost-saving units all the way up to the largest, multi-tower ones - but all offer a dynamic array of thrilling, inclusive features, including:

- A house with two windows, a circular finger maze, and a shop with a counter, sign, and ting ting bell – inspiring plenty of social interaction and memorable role play experiences
- An inclined climbing ramp, allowing children of all abilities to access each unit and play together
- A seat at ground level, enabling visitors to rest and interact with friends or family, ticking the boxes for the social aspect of play
- All multi-towers include a communications panel with 96 symbols based on an NHS approved communication system, which is used across the UK for non-verbal communication

Key Features

- Many of the units also include unique elements which enhance their visual style and **fantasy aesthetic**, such as feature flags, a ridge roof, and ying yang treads, whilst the range's construction and design delivers **great utility and durability**.
- All units feature a **compact design** which minimises their overall footprint-making **excellent use of any space**, and reducing the amount of safety surfacing required.
- They all offer a vibrant **mixture of colours**, including striking blue and pistachio green, vivid orange, warm/light grey on the mainline units, as well as autumnal brown on the themed units.

Posts & Poles

All upright posts are square powder coated steel, 80mm x 80mm with a 3mm wall. This high-quality material is powder coated using a sustainable electrostatic process proven to withstand the rigours of daily use and the harshest of outdoor environments.

All poles are powder coated and manufactured from 38mm x 10swg steel tubing. We use a local supplier whose mild steel includes an average of 76% recycled content.

Panels

Our high quality, HDPE panels are supported by mild steel powder coated box steel posts. At 19mm thick, they offer an excellent strength-to-density ratio and very high impact resistance.

HDPE is an extremely versatile thermoplastic polymer and we use this to manufacture our play panels, and other components across our product ranges. Our HDPE is sustainably sourced and easily recyclable.

Decks

Our anti-slip floor panels are manufactured from 15mm thick grip profiled HDPE to ensure a very long life and are supported by a 50 x 30mm powder coated box steel construction.

HDPE is resistant to mould and rotting as well as most strong mineral acids and naturally occurring chemicals. It is also easily recyclable, helping to keep non-biodegradable waste out of landfill.

Slides

All the units have bedway slides that are 1.2m high and manufactured as a one-piece stainless steel structure with additional support along the run-out section.

The stainless steel in our products is durable, maintenance free, easy clean, and suitable for all environments. We source our stainless steel locally from an enterprise which is a leader in sustainability and whose steel output includes a recycled content of between 85% and 90%.

Nets

Using nets on our play equipment helps to develop co-ordination, strength and confidence as well as giving a little challenge. The durable 16mm steel-cored rope we use offers great durability, allowing it to endure heavy sustained usage for long periods without requiring replacement, helping to minimise wastage.

Gnome Springie

SSB620

Side transfer accessible

The ideal accompaniment to our Fantasy range, our Springie's deliver rocking fun for younger children. Their design also features a side transfer system, enabling easy access for wheelchair users.

Each springie seat is manufactured from a 19mm thick HDPE, which is routed to include an integral side handle for added support. The colourful side panels on each springie are constructed from 19mm Eco HDPE, they feature a gnome, wizard or selkie graphic routed into the outer surface - which are sure to engage young visitors. A second, double-width handle is also incorporated into this side panel.

These springie's feature a backrest for extra support, and a double foot rail/heel guard to support the child and help them place their feet into the best position, they are intended for children aged 2-8 yrs, but they can also facilitate older children who require side transfer accessibility.

This unit can accommodate 1 user.

Small Inclusive Roundabout

SIR150

Offering inclusivity, functionality and durability, without compromising on the timeless fun of a thrilling spin, this small inground roundabout is designed to accommodate a centrally positioned wheelchair.

It features a pair of shaped handrails which offer support for the child or adult in the centre (whether standing or seated), and the same rails also act as a stopper for wheelchairs when in position.

The design on the roundabout's edge allows bystanders to more accurately gauge its speed when in motion, whilst its contrasting lime green colour acts as a visual indicator for partially sighted users – boosting the unit's overall inclusivity. In addition, the deck itself incorporates a floor graphic to indicate the best position for the wheels.

The Small Inclusive Roundabout also includes an inspection hatch to monitor underground conditions if required.

This unit can accommodate 1 to 2 users.

Pentagon Range on top of the world

Reach new heights with Pentagon, our junior multi-play tower range...

Delivering a host of thrilling play opportunities for the 6 -14 age group, our new range offers many exciting features including a crevasse ladder, a circuit climber, scramble rope climber, a climbing wall between decks and more, as well as a number of individual features which make each multiplay unit unique.

From ground level the design of this range enables users to weave from left to right and quickly ascend to the top while minimising the fall height.

There are play opportunities from ground level and at both 1.6m and 2.4m to add to the play value along the way.

There is a challenging zig zag climber, available on all but one of the units, which makes for an alternative climb to the top and various slide options for a fun ride back to ground level.

35

Stainless Steel Slide

Built to last

Fun for all

Constructed from durable metal support frames and colourful HDPE panels, every tower in this diverse, dynamic range delivers the same thrill of an exhilarating climb.

From single tower units taking up a smaller footprint through to the Helix, a larger double tower unit and the largest and most ambitious unit in the Pentagon range, the whole range offers an array of challenging play opportunities for children of junior age.

Being able to accommodate up to 29 children playing, the largest unit has 17 play features incorporating over 5 climbing structures, 2 slides and many social engagement elements.

We have considered smaller play spaces for these exciting units so that even more compact ones are still able to offer a range of similar features but on a much more cost-effective footprint.

Key Features

- The **compact design** of all the multiplays in this range minimises the overall footprint and reduces the amount of safety surfacing required.
- Each unit features high quality, curved powder coated posts and galvanised steel support frames. They all have **anti-slip floors** and solid, 19mm HDPE infill panels which makes them both **durable and sustainable**.
- All units are available in a lime and pistachio green and grey colourway, **enhanced by vivid orange detailing**.

Posts & Poles

Each Pentagon unit is constructed from 100mm by 3mm wall rolled, curved powder coated posts, and galvanised steel support frames that provides the design with a stable and robust chassis. All poles are powder coated and manufactured from 38mm x 10swg steel tubing.

Our mild steel has been proven to withstand the rigours of daily use and the harshest of outdoor environments. We use a local supplier whose mild steel includes an average of 76% recycled content.

Panels

Our high quality, HDPE panels are supported by galvanised steel support frames and at 19mm, thick they offer an excellent strength-to-density ratio. HDPE is an extremely versatile thermoplastic polymer, we use this to manufacture our play panels, and other components across our product ranges.

Our HDPE is sustainably sourced and easily recyclable, helping to keep non-biodegradable waste out of landfill.

Decks

With their hard-wearing nature and excellent strength to weight ratio, these non-slip 18mm Hexastrong floor panels are ideally suited for use on playground equipment. All decks are supported by a 80 x 40mm galvanised box steel construction.

These panels are produced primarily from timber and can be considered a renewable resource. Our supplier is FSC (Forest Stewardship Certification) certified.

Slides

The slides used on Pentagon are each made from one of two different materials: stainless steel, which is durable and maintenance free, and rotor-moulded LDPE, a type of plastic known for its flexibility and resistance to moisture. Both have been chosen for their robust compositions.

We source our stainless steel locally from an enterprise which is a leader in sustainability and whose steel output includes a recycled content of between 85% and 90%.

Nets

Using nets on our play equipment helps to develop co-ordination, strength and confidence, as well as giving a little challenge. The durable 16mm steel-cored rope we use offers great durability, allowing it to endure heavy sustained usage for long periods without requiring replacement, helping to minimise wastage.
